# Who We Are

**>40** years  
of experience

**549** units  
of FGV transport fleet capacity

**0.95** million MT  
Oleochemical storage throughput

## Our Vision

To become the leader of total supply chain and logistics services provider in Malaysia by 2023

## Our Mission

Offering logistics related services at competitive rate and fulfilling customer's needs

Producing disciplined, trustworthy and innovative employees to achieve company's targets

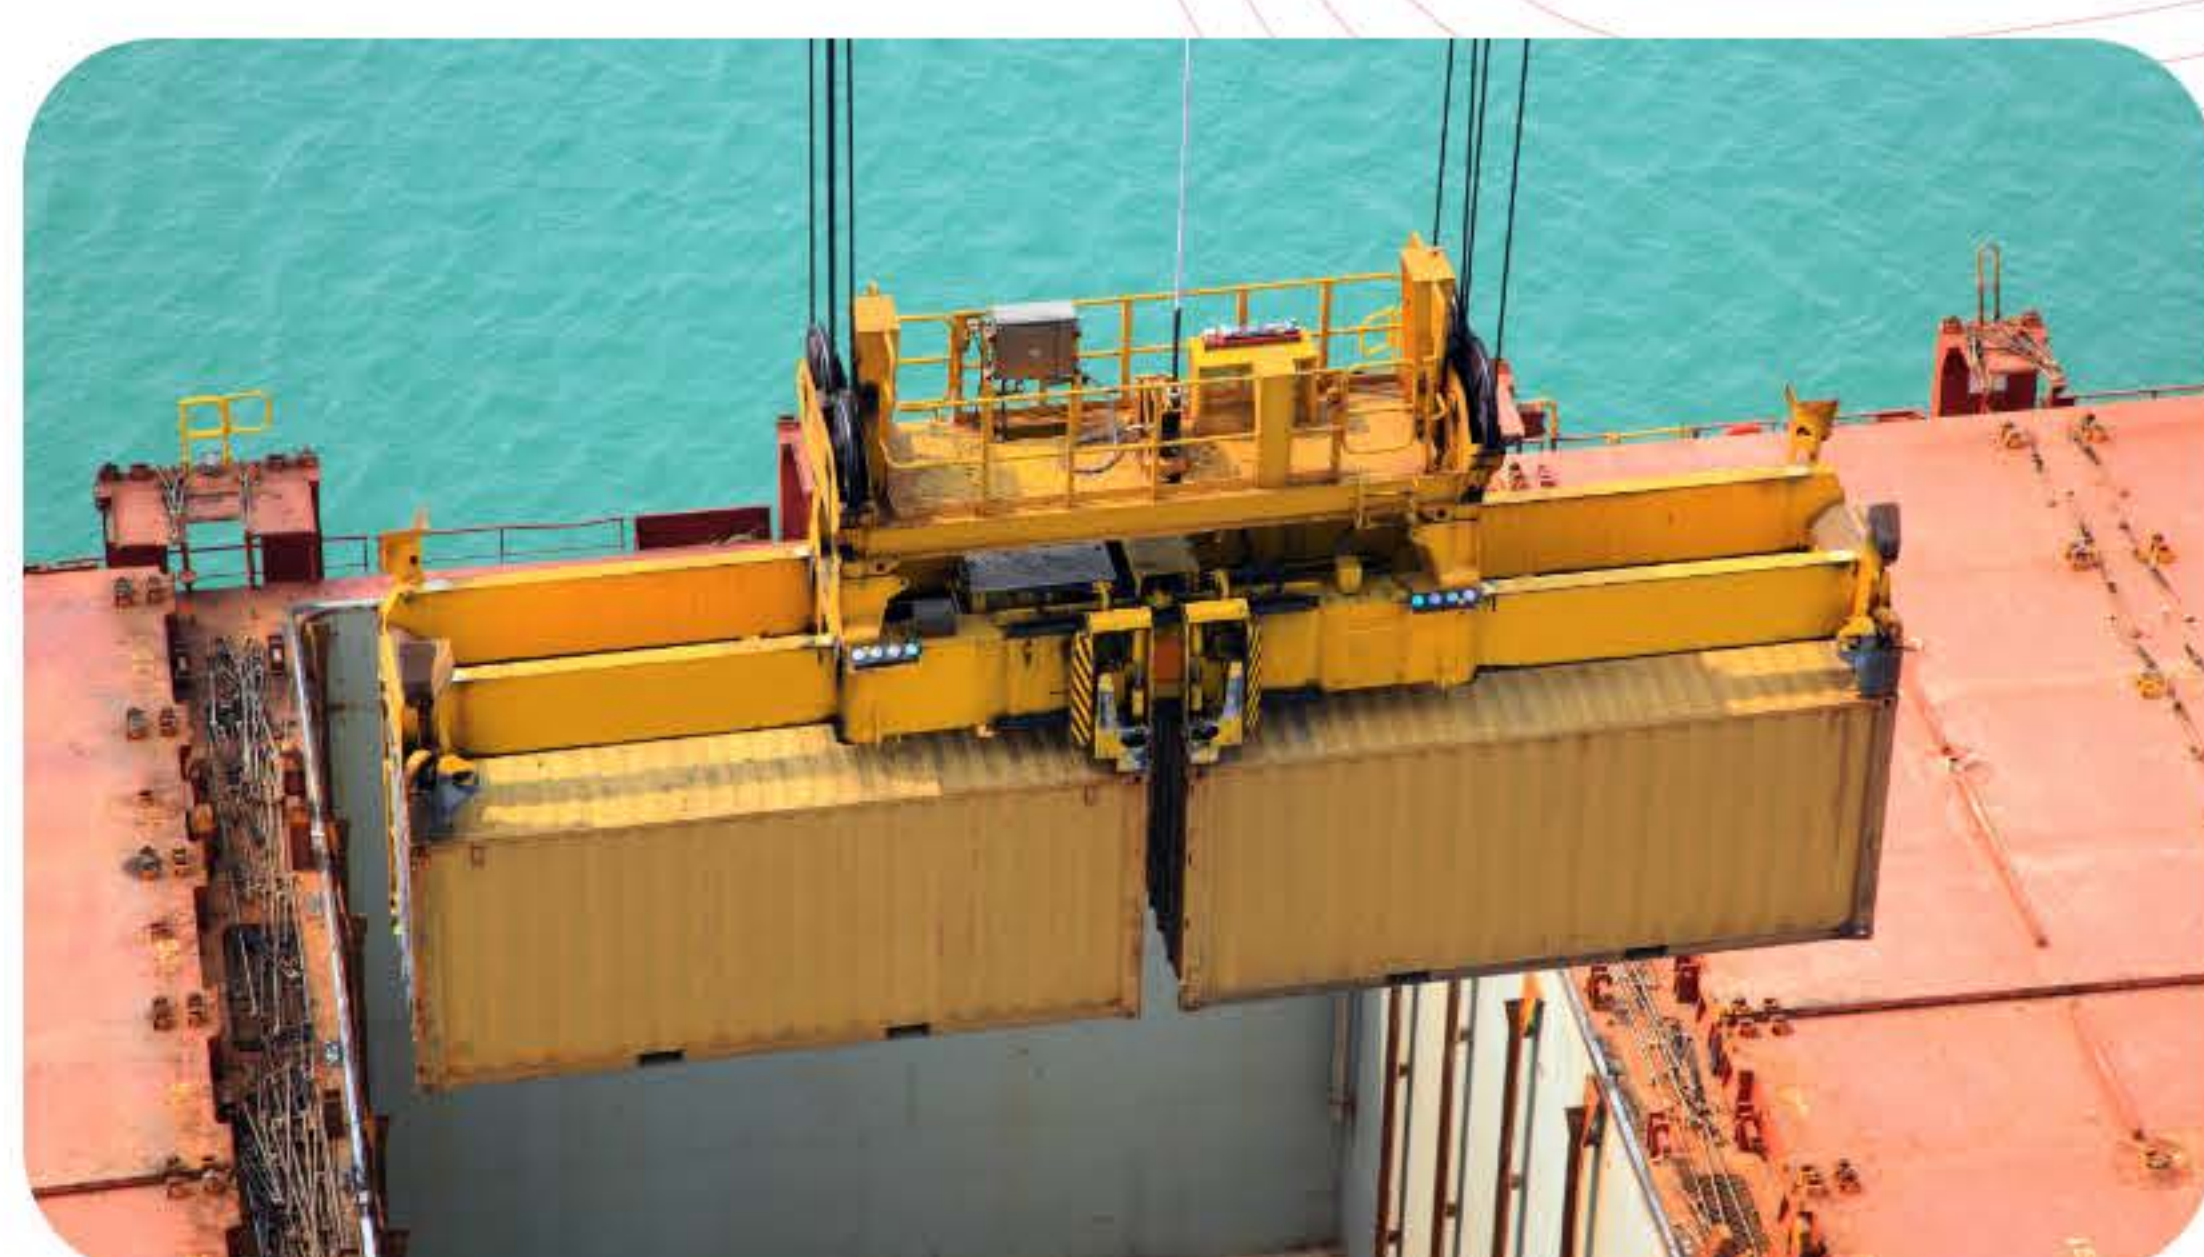

Providing efficient, accurate and safe services

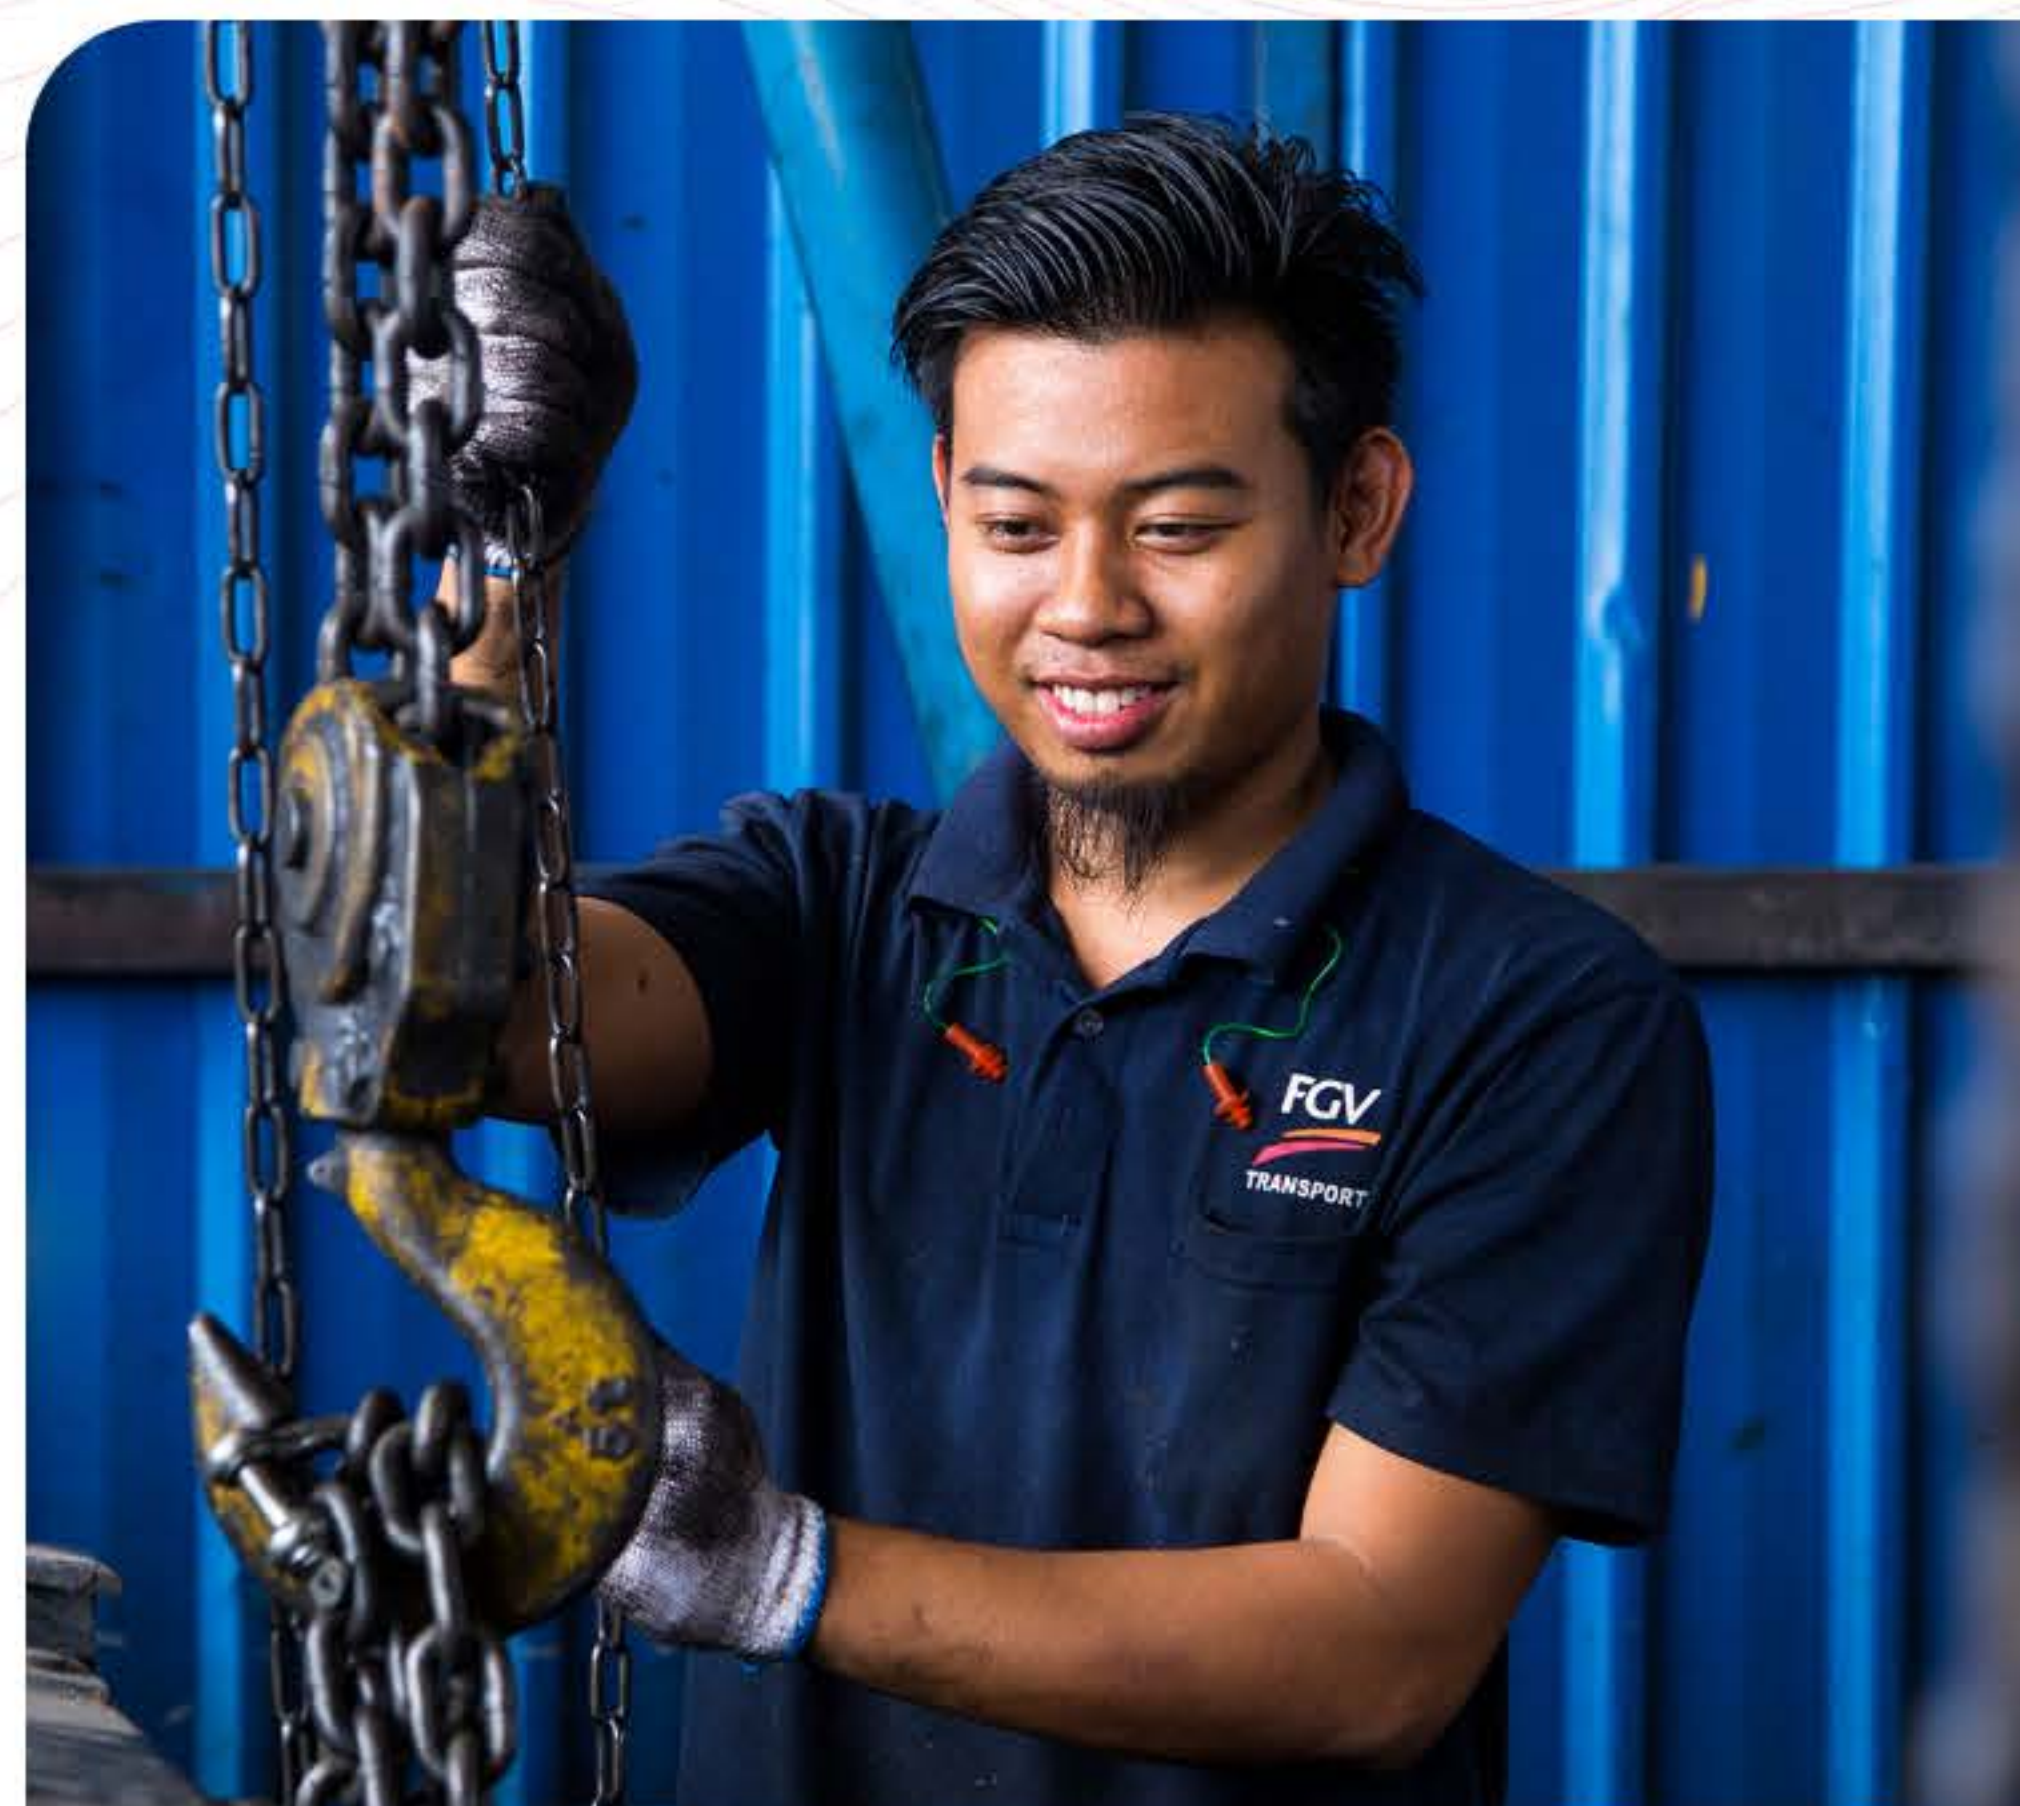

**FGV Transport Services Sdn Bhd (FTSSB) is a total logistics service provider catering both to domestic international transportation/shipping requirements.**

The company operates from various locations nationwide including all major Malaysian ports offering customers a variety of transportation and logistics needs.

As a subsidiary of FGV Holdings Bhd, FTSSB has come a long way since it was first established in 1975. Initially set up to provide inland transportation services to Felda Group of Companies. The experience, expertise and capabilities acquired over the years have transformed the company.

# How We Keep Global Trade Moving

## Technical & Maintenance

We have our in-house workshop at each depot to manage maintenance and services of fleet which are led by engineer and repair by foreman, mechanics, electrician and welders. They have been trained and vast experience in their work.

The advantages to have in-house workshop are:

- > Costs control
- > Quality control
- > Customized service procedures
- > Quicker fleet turnaround
- > Lower parts cost
- > Familiarity with fleets
- > Maintain own records with unlimited access

## From Plantation To Destination

With our global network of experts in mature and emerging manufacturing centers, we design comprehensive solutions that optimize transportation flows across sites, using all modes, to harness the full critical mass of the enterprise—driving out costs while achieving service levels.

Whether it's inbound production materials, finished goods to distribution centers, interplant work-in-progress (WIP) flows, or shipments to customers, our logistics programs are customized to meet your unique needs.
